About Me

I'm a software developer skilled in ASP.NET, Spring Boot, Node.js, SQL and front-end technologies like CSS, HTML, JavaScript, and Bootstrap, also a good user of Git. With hands-on experience in Agile methodologies and a recent graduation from 'recoded' boot camp, I'm equipped to drive innovation and excellence in software development

Work Experience

T-HOS | KÜTAHYA TEKNOKENT

07/2022 - 11/2022

BACKEND DEVELOPER

- Developed a Windows Form application using C# to streamline customer onboarding processes for legal professionals
- Automated tasks such as creating new domains, databases, and configuration file updates with a single click, significantly enhancing efficiency.
- Contributed to the enhancement of the core ASP.NET source code, specifically focusing on improving the handling and editing of individual "cases" within the system.

DUMLUPINAR UNIVERSITY

12/2021 - 02/2022

INTERN

- Collaborated with the hardware and network team, gaining hands-on experience in system architecture, servers, routers, and troubleshooting.
- Assisted in resolving hardware and network issues, contributing to problem-solving efforts.
- Gained practical exposure by maintaining and formatting hardware components, enhancing my understanding of networking.
- Deepened knowledge of network systems and server operations.

Projects

PEBBLEWORK

[project link](#)

Tech stack : node.js,mongodb,unit test, API,Git

"PebbleWork" is a platform to organize volunteer local events and gatherings to create meaningful work and an impact.
build with team of 4 engineers communicated and developed on github.

RETAILER-SUPPLIER CHAIN MANAGEMENT SYSTEM

[project link](#)

Tech stack : java,servlet, jdbc, bootstrap

A Java Servlet-based web application designed to streamline the operations of retailers and suppliers within the supply chain.

E-COMMERCE MARKETPLACE API

[project link](#)

Tech stack : C#,ASP.NET core, Entity framework, design patterns

An E-Commerce Marketplace API with a SOLID-compliant n-tier architecture, powering seamless and scalable online shopping experiences.
